

# U.S. Environmental Protection Agency

## Hunters Point Naval Shipyard (HPNS) Superfund site

Hunters Point Shipyard (HPS)  
Citizen's Advisory Committee  
Subcommittee on  
Environment & Reuse

September 28, 2020

**Yolanda Sanchez**  
Communications Lead,  
Superfund HPNS Site Team

# EPA's Role at the Hunters Point Naval Shipyard Superfund site

- Provide Navy oversight to ensure Superfund laws and regulations, as well as EPA policies are met
- Review and provide comments certain work plans and reports
- EPA's mission is to protect human health and the environment

# HPNS 2020 Radiological Retesting Activities: EPA Oversight Role

- Overseeing an approach that confirms the remedies are protective of human health and the environment
  - Comments on the Navy's report on the soil background study
  - Approval of Navy's plans to perform soil radiological retesting at Parcel G, which include dust management and air monitoring
  - Comments on the Navy's radiological cleanup levels for existing onsite buildings

# HPNS 2020 Radiological Retesting Activities: EPA Oversight Role

- Oversight on the ongoing fieldwork
  - EPA has technical experts onsite
  - EPA will independently-analyze select soil samples, working with the state
  - EPA is paying close attention to the Navy's implementation of its dust management and air monitoring plan
    - ✓ Reviewing perimeter air monitoring data
    - ✓ Weekly check-ins with project managers

# Questions on EPA's Role?
