

June 4, 2025

Dear Candlestick Neighbors:

We are writing to inform you that we will soon restart our **soil import program** at Candlestick. We expect to begin this effort during the last week of this month, June 2025. As a reminder, this soil will be imported as fill at the former Candlestick Stadium at intermittent intervals. This activity is related to the future infrastructure work and is necessary to raise the grade of the site. The import will take place as follows:

Anticipated start date: Week of June 30, 2025

Work hours:

Monday – Friday, 7am-5pm

No Saturday work is anticipated at this time. Should that be necessary, you will receive another notification

Stockpile Location Harney Way (Former Candlestick Stadium site, future Candlestick Center's "Infield" area. *See diagram for truck route*

Weather permitting, the import activity is expected to last until November 2025. Updates will be available on the HPSCAC website www.hpscac.net.

Just as with earlier import activities, all earth work will be conducted in accordance with Candlestick's Site Mitigation Plan and Asbestos Dust Mitigation and Fugitive Dust Control Plan, prepared in accordance with BAAQMD, SFDPH and RWQCB regulations.

Tire washing and cleaning of construction vehicles leaving the property will be conducted.

If project-specific action levels are recorded at the perimeter air monitors, the contractor will be notified and dust control measures will be enhanced until readings are below the action levels.

Should you have any questions, the hotline number is 1-866-553-6627.

Sincerely,

La Shon A. Walker

La Shon A. Walker
Vice President of Community Affairs
