

Parcel B: Radiological Investigation

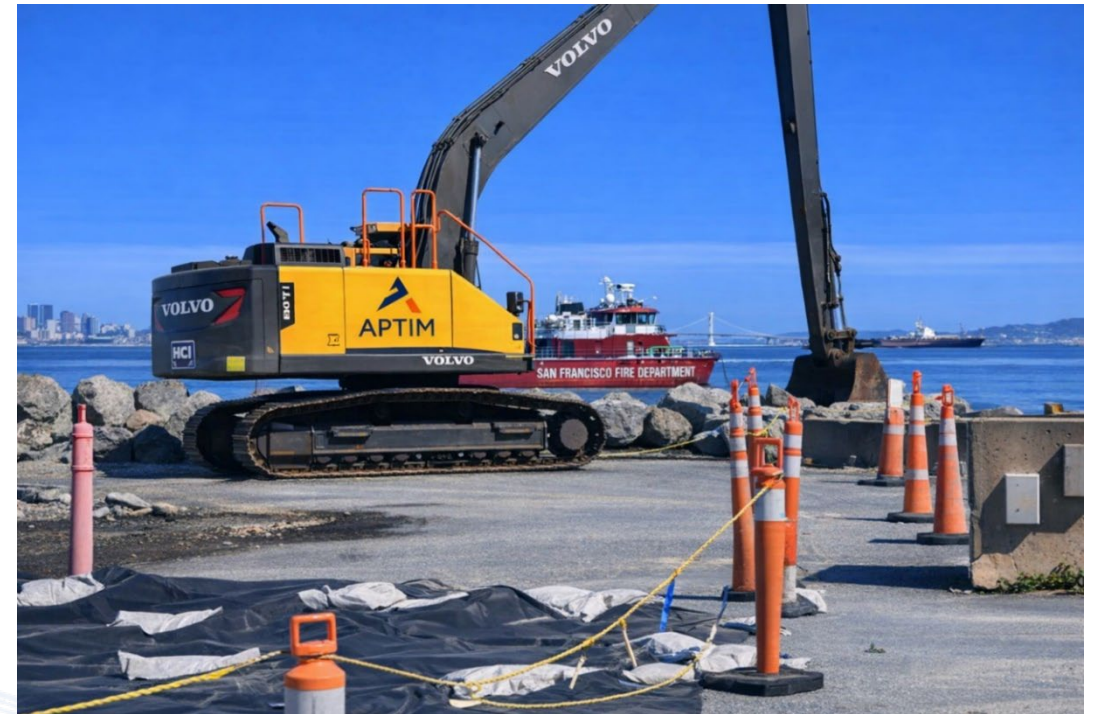

Overview of Project & Local Hiring Opportunities

July 16, 2026

Who is APTIM?

- APTIM specializes in environmental, sustainability, resilience, and infrastructure solutions
- Nationwide, APTIM performs site assessment, investigation, and remediation work for federal clients including the Navy, Army Corps, EPA, and FEMA
- 25+ years supporting Navy projects at HPNS and the surrounding Bay Area, including recently completed projects on Parcels D-1, E, E-2, and successful completion of the same type of work at Parcel G, and the recent Parcel C Dry Dock repair
- Enduring relationships with local small business subcontractors and suppliers in SF and Bayview
- Long history of hiring local employees for careers
- Two (2) multiple award contracts (RADMAC III and Demo MACC) over 8 years

APTIM performing Parcel C Dry Dock Repair

Parcel B Project Description

- Radiological remediation of former sanitary sewers/storm drains to achieve the Record of Decision Remedial Action Objectives
- Excavate, radiologically process, and backfill 54 Trench Units
- Fieldwork sequenced to minimize impact to artist community
- Air monitoring during all field activities
- Project schedule is 2 years beginning May 2026 with field mobilization in Fall 2026

Parcel B
